

BlueCherry® Omnichannel Warehouse Management (OCWM)

In today's omnichannel business environment, retailers are challenged to provide a seamless shopping and customer service experience across brick-and-mortar, e-commerce, and all other channels. To meet customer expectations, consumer lifestyle products retailers and their suppliers must leverage the latest in supply chain logistics, inventory management, and order fulfillment technologies.

Perhaps more than any other business process, warehouse and distribution operations vary widely across different organizations. Variations in products, constraints of the physical facilities, shipping methodologies and sheer volume all contribute to this fundamental reality.

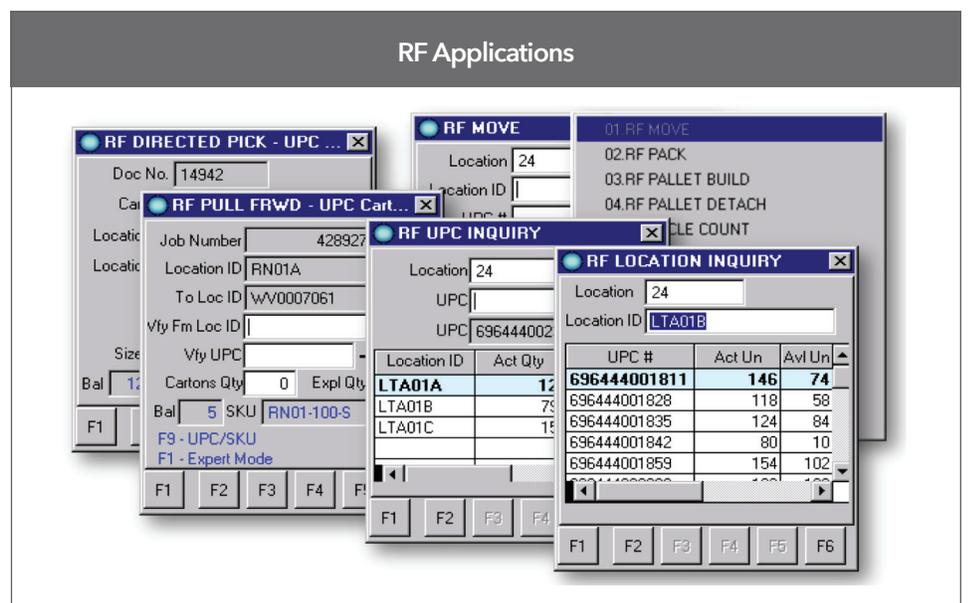

The **BlueCherry®** Omnichannel Warehouse Management (OCWM) solution delivers the capabilities needed to handle the most sophisticated needs. Because OCWM is inherently integrated with the **BlueCherry®** Enterprise Suite, it provides seamless omnichannel order fulfillment without the need for costly and time consuming third-party interfaces.

Whether you have multistage picking processes, perform quality assurance procedures, handle cross-docking, want paperless picking operations by using wireless scanners, track fabric to the roll level, need RFID capability, or use material handling systems like Put-to-Light or automated conveyors, **BlueCherry®** OCWM can be set up to handle the data flows and operations, while providing increased visibility into all warehousing activities.

Like all **BlueCherry®** software, OCWM is designed to work on a manage-by-exception basis, so warehouse managers can address problematic issues immediately rather than wading through numerous reports to determine if and where a problem exists.

Key Benefits

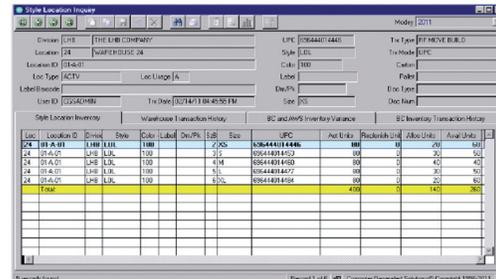

- Advanced Capabilities**
 Handles even the toughest warehousing/distribution challenges; integrates movement of product and information throughout the supply chain.
- Optimizes Efficiency**
 Eliminates inefficient movement, redundant efforts, and excess inventory.
- Saves Time & Money**
 Eliminates paper pick tickets in the warehouse.
- Improves Service & Flexibility**
 Exceeds customer demands for improved speed, accuracy, and reporting.
- Fully Integrated**
 Seamlessly extends the warehousing capabilities of BlueCherry; eliminates requirements for building and maintaining WMS interfaces.
