

BlueCherry EDI

Overview

BlueCherry Electronic Data Interchange (EDI) is a comprehensive solution designed to automate and streamline the exchange of critical business documents between BlueCherry ERP and external systems. By supporting a wide range of EDI standards and offering advanced “any-to-any” data conversion capabilities, BlueCherry EDI enables seamless collaboration with retailers, suppliers, 3PL providers, and other business partners. This solution helps businesses save time, reduce errors, and improve operational efficiency.

Manual data entry and document exchange can lead to costly errors, delays, and inefficiencies. BlueCherry EDI eliminates these challenges by automating the exchange of purchase orders, invoices, shipping notices, inventory updates, and more—ensuring speed, accuracy, and compliance.

Key features and benefits

Advanced data exchange

- Automates the conversion and exchange of a wide range of business documents across systems. Reduces manual errors and accelerates transaction processing for improved efficiency.

Retail collaboration

- Standardized support for retail-specific transactions like purchase orders (850), invoices (810), and advance ship notices (856). Enhances communication with retailers while ensuring compliance with industry requirements.

Logistics & warehouse automation

- Automates interactions with 3PL providers for tasks like pick ticket transmission, inventory updates, shipment tracking, and invoicing. Streamlines supply chain processes and improves visibility across logistics operations.

Only BlueCherry offers

Full-Scale Integration Across Systems: Goes beyond traditional EDI by offering modular tools that integrate seamlessly with BlueCherry ERP and external systems.

Customizable & scalable: Purchase only the modules you need today, with the flexibility to expand as your business requirements evolve.

Managed service options: Offers complete day-to-day management of EDI processes for businesses that prefer an outsourced solution.

Decades of industry expertise: Our EDI team brings decades of hands-on experience in fashion, retail, and consumer goods, with a proven track record of implementing, optimizing, and supporting EDI solutions that drive operational efficiency, compliance, and supply chain success.

Use cases

Retailer collaboration for speed-to-market: Automate the exchange of purchase orders (850), invoices (810), and advance ship notices (856) with major retailers. This ensures compliance with retailer requirements, reduces manual intervention, and accelerates order processing and fulfillment, helping companies bring products to market faster.

3PL integration for logistics efficiency: Seamlessly connect with third-party logistics providers to automate pick ticket transmission, shipment tracking, inventory updates, and invoicing. This streamlines warehouse and distribution operations, improves visibility, and reduces errors across the supply chain.

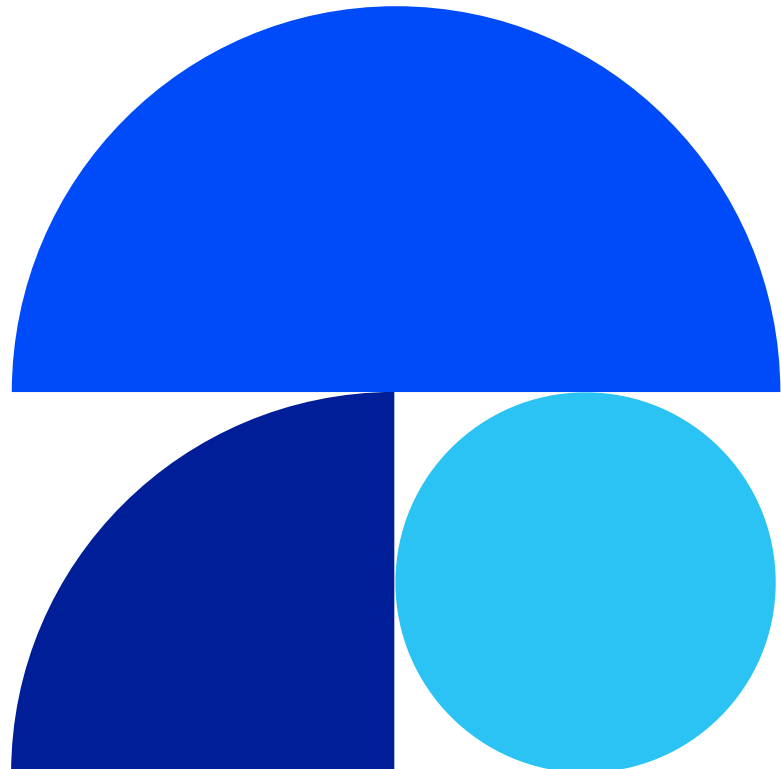

Production and accounts payable automation: Automate the sending of production orders to manufacturers and handle accounts payable for carrier invoices. This integration accelerates collections, expedites payment reconciliation, and ensures that production and financial data flow efficiently between business partners and internal systems.

Technical specifications

Platform compatibility: Supports integration with retailers, manufacturers, warehouses, banking institutions, e-commerce platforms, and more.

Any-to-any data conversion: Handles XML, CSV, flat files, table-to-table transfers, and traditional EDI standards.

Cloud-based architecture: Ensures secure and scalable operations with real-time or near-real-time data exchange.

Ready to optimize your business operations?

BlueCherry EDI is your solution for seamless data exchange across trading partners—delivering speed, accuracy, and compliance at every step.
